

Table with Footnotes

Andy Merlino

Thursday, November 20, 2014

Attempting to create a \LaTeX table with good footnotes. I need the table to be generated using an existing R package for generating \LaTeX tables from R code. Thus, the footnote command cannot be directly typed into the table; it must flow through the R package for table generation.

The xtable package

This seems to be the best option:

Exhibit I

	col.one ¹	col.two ¹	col.three ²
A	1.10	4.00	TRUE
B	9.90	7.00	TRUE
C	2.30	8.00	FALSE

¹This is my first explicit footnote

²This is my second explicit footnote
